16 September 1968

Dear Harold & LIL;

I am writting you on my study-break again, so this will have to be short as so is my study-break, mainly I have a lot to do in the way of studying these days in order to make the transition from Deyahn to scholar.

I'm having a minor hassel with the Israeli scholastic represenatives because my first semester here ends after second semester over there starts. I ain't gonna drop out either, not for anybody.

Raul, my tues. & thurs. ride to school got real uptight when he just recently found out that you aren't a part of the D.A.'s office. I still laugh at the look on his face, sheer terror. Also Mrs. Gerraci is trying to get Phillip out on a hardship discharge and is playing games and making pacts with "bad" people. Phillip might be Godfrey's roommate at Jackson.

I haven't heard from you all for awhile. What's happening up there, not including the shop?

When I drink orange juice, it's like swollowing dynamite as far as my stomach's concerned. Also, no more pizzas. It's getting better though. How come you don't have ulcers yet?

My leg is holding up just great as long as I don't run up & down stairs, I hardly notice any difficulty. I once used to be a good stair-runner too, but will submit to the restrictions imposed as long as it remains to hold up.

Next summer, I will probably be herding sheep over in Israel, healthy as hell.

I'm getting my Nikon F back tommorrow morning, but don't quite know what I'm going to with it, as I'm not that hung up on photography. Goldfish (bernie) and both Jacks will have a coronary. heh! heh! Maybe I could get Matt to teach me some things on it in exchange for a telephoto lens he can use. I'll have to ask him. I have $ 900.00 worth of Nikon stuff going to waste. I might just stick it up in the attic again and forget about the whole thing again.

I sold most of my diving equipment, compresser, tanks and the whole bit. I'm gradually getting rid of my toys.

Write sooner than that.

D.

Dear Dian,

Thanks!

Best,
